

UX/UI Designer

Would you like to be a part of a global market leader who acts as a startup? Nilfisk aspires after visions that might seem impossible, but they commit themselves to try anyway. They are currently powering up a traditional, industrial company and disrupting it from the inside.

Get an opportunity to build up products from scratch and see them launch globally, while influencing the company's digital journey.

Nilfisk is looking for the biggest and brightest talents and are allocating large budgets to create what they cannot even see yet. By being a part of Nilfisk, you will grow rapidly by working with the most skilled colleagues in the field.

Join the process early and help define the next chapter in the innovation history of Nilfisk.

JOB DESCRIPTION

As UX/UI Designer, you enjoy working in a fast-paced and dynamic environment with many different stakeholders and with strong structural skills you can maintain an overview of many ongoing tasks. Your passion is user-centered design principles, methodologies, and best practices, particularly as applied to web- and digital platform applications.

You will be working closely with other UX Designers, Product Owners, Software Engineers etc., and will participate in the development of software and platforms. Your main ambition is to make sure customers are provided with the best user experience and that our solutions are designed so the "touch and delight" our users around the world.

Your primary tasks and areas of responsibility:

- Build great user experiences and intuitive interfaces
- Visualize concepts prior to design
- Discuss with the team regarding user centricity
- Gain insights and feedback from customers
- Perform usability tests and report findings to the PO and development team

REQUIRED SKILLS AND EXPERIENCE

The ideal candidate is expected to have an education in digital design at BA or MA level, but experience from a similar role is more important.

Furthermore you:

- Have hands-on experience with digital platforms beyond the browser – mobile, multi-touch, widgets, desktop software, UI components and controls
- Think digital design wherever you look, and focus is always on experience over prettiness
- Are as curious about the backend as you are about the frontend, so even though you don't code you understand technology in general
- Experience with: Sketch and InVision
- Concept development and idea generation
- User Experience - information architecture, user flow, wireframing, prototyping, usability etc.

Most important qualification is your portfolio and work methods.

Show us examples of how you work:

- User journeys and user stories (service design)
- Storyboards (user research)
- Sitemaps, flows and wireframes (customer pain & gain)
- Prototyping (design sprints)

COMPANY DESCRIPTION

At Nilfisk, they rest on more than 110 years of innovation experience and ever since the company was founded, growth and development has been a part of their DNA. In 2018, they launched their new corporate strategy, Nilfisk Next, with an ambition of radically changing “the world of cleaning”. A key cornerstone in the Nilfisk Next strategy is to develop digital services and solutions.

Today, the Digital Services team, work with the latest technologies like IoT, Cloud, AI and Analytics. They are adding more competences to the team – and are looking for colleagues who

are motivated to “build the bridge while walking on it” and have a great influence in setting your mark on how Nilfisk works and operates.
