

Front-End Technology Lead, Web & Mobile

Are you passionate about designing and developing front-end solutions? Do you want to work in a global business on a digitalization journey and delivering fast and functioning Front-end solutions through the platforms: Xamarin, Umbraco, and Microsoft Azure?

Nilfisk has set out to revolutionize the global cleaning industry by use of high-end digital solutions like unmanned cleaning robots. As part of this they are taking their total operation to the next level, and you will get the chance to put your personal mark on the way Nilfisk works with digital development for years to come.

JOB DESCRIPTION

As their new Front-end Technology Lead you will be responsible for integrity of the mobile platform and designing front-end web & mobile solutions on Nilfisk's Technology stack. You will need to have an eye for design and strong experience in transition and animation skills to designing state-of-the-art front-end and mobile experiences that solve the business needs. You will be part of a team of technology leads and have a special role in bringing creative design to life in cooperation with the Nilfisk Digital Art Director.

Your primary tasks and areas of responsibility:

- Analyze business and technical requirements
- Act as Technology Lead on Nilfisk's front-end web & mobile platforms
- Manage code & design review of quality and documentation on mobile and web front-technology deliverables
- Supervise the quality of mobile and front-end solutions
- Provide direction in terms of Front-end solution architecture, designs and governance
- Review technical deliverables from developers
- Specify and implement front-end Umbraco and Xamarin solutions within the area of the web and mobile technology domain.

REQUIRED SKILLS AND EXPERIENCE

To be successful in this role, we imagine that the ideal candidate will have more than five years of experience in web and mobile solution development and architecture disciplines including development, integrations, modeling, optimization, and/or other areas directly relevant to mobile development and architecture responsibility tasks. More than three years of experience supporting and working in cross-functional teams and collaborating with business stakeholders in support of multi-departmental web initiative is also necessary, as well as enterprise and platform experience.

As a person you are highly creative and collaborative as you are expected to collaborate with both the business and IT teams to define the business problem, refine the requirements, and design and develop data deliverables accordingly. You also have good judgment, a sense of urgency and have demonstrated commitment to high standards of ethics, regulatory compliance, customer service and business integrity.

Furthermore, you have the following competencies:

- Strong experience supporting and working with cross-functional teams in a dynamic business environment
- An eye for design
- Strong experience in transition and animations
- Knowledge of agile development with cooperation in InVision
- Experience with MVC, MVVM and other relevant Design Patterns
- Strong experience with the .NET frameworks, Object-oriented/development and proficient in HTML, CSS TypeScript/JavaScript, C# and a good knowledge of their ecosystems
- Strong knowledge of different type mobile app development for example WebApps, Xamarin apps, Native iOS and Android apps
- A knack for writing clean, readable, and easily maintainable code and development methodologies – TDD, OOP or OOD, Functional Programming, Design Patterns
- Experience with enterprise ready mobile Solutions deployed on Microsoft Azure, Rest (Micro services) and RESTful APIs

COMPANY DESCRIPTION

Nilfisk is the globally leading player in the professional cleaning industry. Nilfisk rests on more than 110 years of innovation experience and ever since the company was founded, growth and development has been a part of their DNA. In 2018, Nilfisk launched their corporate strategy, Project Next, with an ambition of radically changing “the world of clean”.

Join the process early and help define the next chapter in the innovation history of Nilfisk.
