eCommerce Technical Lead

Are you passionate about designing and developing Enterprise ready eCommerce solutions? Do you want to work in a global business on a digitalization journey and delivering fast and functioning solutions through eCommerce and B2B processes?

Nilfisk has set out to revolutionize the global cleaning industry by use of high-end digital solutions like unmanned cleaning robots. As part of this they are taking their total operation to the next level, and you will get the chance to put your personal mark on the way Nilfisk works with digital development for years to come.

JOB DESCRIPTION

The eCommerce Technology Lead is responsible for the integrity of the B2B eCommerce platform and designing the eCommerce solutions on Nilfisk's Technology stack. To assist you in being the bridge between technology and business people you will apply strong communication, analysis and design skills to gather business requirements to design state-of-the-art B2B eCommerce solutions that solve the business needs.

Your primary tasks and areas of responsibility:

- Analyze business and technical requirements
- B2B Technology Lead on Nilfisk eCommerce platform & solutions
- Responsible for code review/quality and documentation on eCommerce deliverables
- Responsible for the quality of eCommerce solutions, Build management, Continuous Integration process
- Follow and contribute to technical processes, coding standards, and guidelines
- Provide direction in terms of solution architecture, designs and governance for the development
- Review technical deliverables from developers
- Specify and implement SalesForce B2B Commerce (CloudCraze) solutions

REQUIRED SKILLS AND EXPERIENCE

The ideal candidate is expected to have a relevant technical education at BA or MA level, but experience from a similar role is more important. You have five years or more of work experience within SalesForce and eCommerce disciplines including and/or other areas directly relevant to Technical Cloud and eCommerce responsibilities and tasks. A minimum of three years of experience working in cross-functional teams and collaborating with business stakeholders in support of multi-departmental data management and analytics initiatives, is also an advantage.

Furthermore, you have good judgment, a sense of urgency and has demonstrated commitment to high standards of ethics, regulatory compliance, customer service and business integrity.

Additionally, in order to be successful in the job it is key that you possess the following competencies:

- Technical and Business Knowledge/Skills
- Experience across development and cloud-based technologies including object-oriented languages, and the Salesforce technology stack (Apex, Visualforce, SOQL)
- Experience developing using modern javascript front-end frameworks (e.g., React, AngularJS, jQuery, Bootstrap, Salesforce Lightning Design System, Ionic, etc.)
- Experience with B2B Commerce (CloudCraze) preferred
- Understand technical and functional design requirements
- Enterprise - as well as platform creation experience

COMPANY DESCRIPTION

Nilfisk is the globally leading player in the professional cleaning industry. Nilfisk rests on more than 110 years of innovation experience and ever since the company was founded, growth and development has been a part of their DNA. In 2018, Nilfisk launched their corporate strategy, Project Next, with an ambition of radically changing "the world of clean".

Join the process early and help define the next chapter in the innovation history of Nilfisk.
